

The future of energy management

Reduce energy costs — increase your profitability

RUMM manages your utility bills and your carbon footprint by using remote monitoring technology.

We help you to cut costs and boost profits at the same time as helping the environment and achieving your Corporate Social Responsibilities.

Ask yourself these questions:

- Do you have a utility bill of over £200,000?
- Are you feeling pressure over carbon reduction commitment (CRC) legislation?
- Have you experienced a large increase in your energy bills?
- Are you interested in improving your bottom line for little capital outlay?
- Are you concerned about the environment?
- Are you interested in carbon trading?
- Is good corporate governance an issue to you?

RUMM are passionate about energy efficiency and management. We are very proactive in producing cutting edge solutions for our clients.

At RUMM, we work very closely with our clients and have developed close relationships with universities in the educational sector. We also offer consultancy services with organisations such as The Carbon Trust and HEFCW.

About RUMM

We are a professional service provider. We take great pride with the personal relationships we build with our clients. We work as a team, employing the most appropriate technology to help gain outstanding results.

We are happy to provide as full an energy/utility service as our clients require. This can range from; fuel purchasing, meter installation, advanced monitoring and targeting to the project management of associated engineering solutions which will be installed by our partner Tremorfa. Our focus is to reduce utility costs by energy reduction.

We provide our clients with customised online utility information and work with them to reduce their costs and ensure they remain low. We help our clients reduce energy consumption and improve their environmental position, allowing good corporate governance.

RUMM can help you
