

**Job Title:** Security Door Installation Engineer

**Reports To:** Head of National Accounts

**Employment Type:** Full-time

**Location:** UK with travel

**Salary:** Competitive

### About the Role

We are seeking an experienced Security Door Installation Engineer to join our growing team. This is a hands-on, field-based role responsible for the installation, maintenance, repair, and servicing of industrial and commercial door systems.

You will work with a wide range of high-security and automated doors, ensuring all installations and servicing activities meet industry standards, safety legislation, and customer requirements. The role plays a key part in ensuring our customers' sites operate safely, efficiently, and reliably.

This role involves travel to customer sites across the UK.

We are an equal opportunities employer and welcome applications from all suitably qualified candidates.

### Key Responsibilities

- Install, commission, test, and service a wide range of industrial and commercial door systems
- Fit large steel, security-rated doors, including electronic locking and access control systems
- Carry out adjustments, calibrations, and fault-finding to ensure correct alignment and smooth operation
- Conduct safety inspections and on-site risk assessments, ensuring full compliance with health and safety regulations
- Complete service reports, job sheets, and parts requisition forms accurately and on time
- Provide technical support and professional advice to customers, including recommendations for upgrades or improvements
- Liaise with suppliers and manufacturers to source replacement parts and obtain technical documentation
- Work in accordance with company policies, procedures, and site-specific safety requirements at all times

- Participate in on call rota

## Skills & Experience

### Essential:

- Proven experience installing, servicing, and repairing industrial or commercial door systems
- Ability to read and interpret technical drawings and wiring diagrams
- Full UK driving licence
- Ability to pass **Full Security Vetting (NPPV2 Full)**
- Ability to work independently with minimal supervision

### Desirable:

- DHF or equivalent powered door safety certification
- IPAF, PASMA, or CSCS qualifications
- Basic IT skills for electronic reporting and job management systems

## Salary & Benefits

- Competitive salary (dependent on experience)
- Overtime and on-call allowances (if relevant to role)
- Company vehicle, fuel card, and specified tools provided
- Pension scheme
- Opportunities for professional growth and development, including access to an onsite demonstration facility
- A collaborative and inclusive working environment
- Free membership to our Health Club (located adjacent to our office)
- 23 days annual leave plus bank holidays, **plus a minimum additional 3-day allocation for the Christmas shutdown**
- Free access to our Employee Assistance Programme
